OUR PHILOSOPHY

Our company is not only built on the aesthetic of our workplace but also on the team's desire to learn and improve continuously. At VUUN, we believe that communication between ourselves and our clients is the key to success!

OUR MISSION

To handle the needs of our unique customers from end to end and contribute with our expertise.

OUR VISION

We are determined to write a success story together with our experience in the cornerstones of businesses.

OUR GOALS

We are transforming Turkey's production and workforce quality into value-added services.

ABOUT US

VUUN is a UK-based garment-design and apparel-agency company founded in January 2021, with offices in London. We partner with our long-standing Türkiye production partner, VUUN Tekstil San. ve Dış Tic. A.Ş., based in Istanbul, to deliver high-quality seamless, seamed, and bonded garments to clients across the world.

Our hybrid model unites UK-based commercial direction with Türkiye-based production capacity — giving our clients direct access to expert craftsmanship at competitive lead times, without the friction of managing offshore relationships in-house.

VUUN's foundation draws on extensive cross-sector experience in information technology, digital projects, and B2B services dating back to 1999. This technology heritage informs everything we do: CRM-driven customer relationship management, structured project workflow, data-led production planning, and rigorous sample-tracking systems.

We bring an engineer's discipline to apparel — clear documentation, reproducible quality control, and transparent communication at every stage of the production cycle.

Key Activities

Both causal and functional activewear production

Geographical Location (Area of Operation)
